Summary

Full Stack Developer with 5+ years of hands-on experience designing, developing, and implementing applications and solutions using a range of technologies and methodologies. High level understanding of web applications. Advanced knowledge of HTML, CSS, and Javascript usage, best practices, accessibility, and performance optimizations. Spearheaded an initiative to modernize a company away from legacy technologies and frameworks, increasing developer productivity and product performance. Streamlined deployments and testing by introducing a CD pipeline, saving over 200 hours of labor a year.

Skills

Frontend

Javascript · Vue · React · jQuery · CSS · SCSS/SASS · HTML · DOM · Bootstrap · Redux

Backend

REST · JSON · APIs · Node · SQL · GraphQL · Serverless · PHP

Development

Git · Docker · Webpack · Typescript · Eslint · Jest · NPM · Firebase · CI/CD Automation

Experience

Grey Sky Media | Lead Frontend Developer   March 2018 - Present | Rocklin, CA

Small business with a focus on developing fully-custom APIs, web, and mobile applications.

- Lead development on multiple web applications with a team of three developers.
- Implemented a continuous deployment pipeline that automated linting, testing, and deployment to a serverless architecture.
- Outlined company-wide standard operating procedures, outlining coding standards and workflow.
- Performed code reviews to ensure coding standards and best practices were met.
- Participated in project scoping and planning.

Freelance | Developer   July 2017 - March 2018 | Sonora, CA

Operated as a freelance developer focused on small business solutions and marketing.

- Created and adhered to project contracts, scopes, and deadlines.
- Developed high-performing websites using PHP and served with nginx.
- Managed email gateways with a self-hosted server.

Emeba, LLC | Developer   August 2016 - July 2017 | Modesto, CA

Multimedia company providing video, audio, and web services.

- Developed dynamic and real-time digital signage media using Scala, VBScript, and 3rd party APIs.
- Provided local on-site tech support and maintenance of leased equipment.
- Created a framework for on-site storage using Microsoft Access.
